FALL 2010 - ARCHITECTURAL SEMINAR

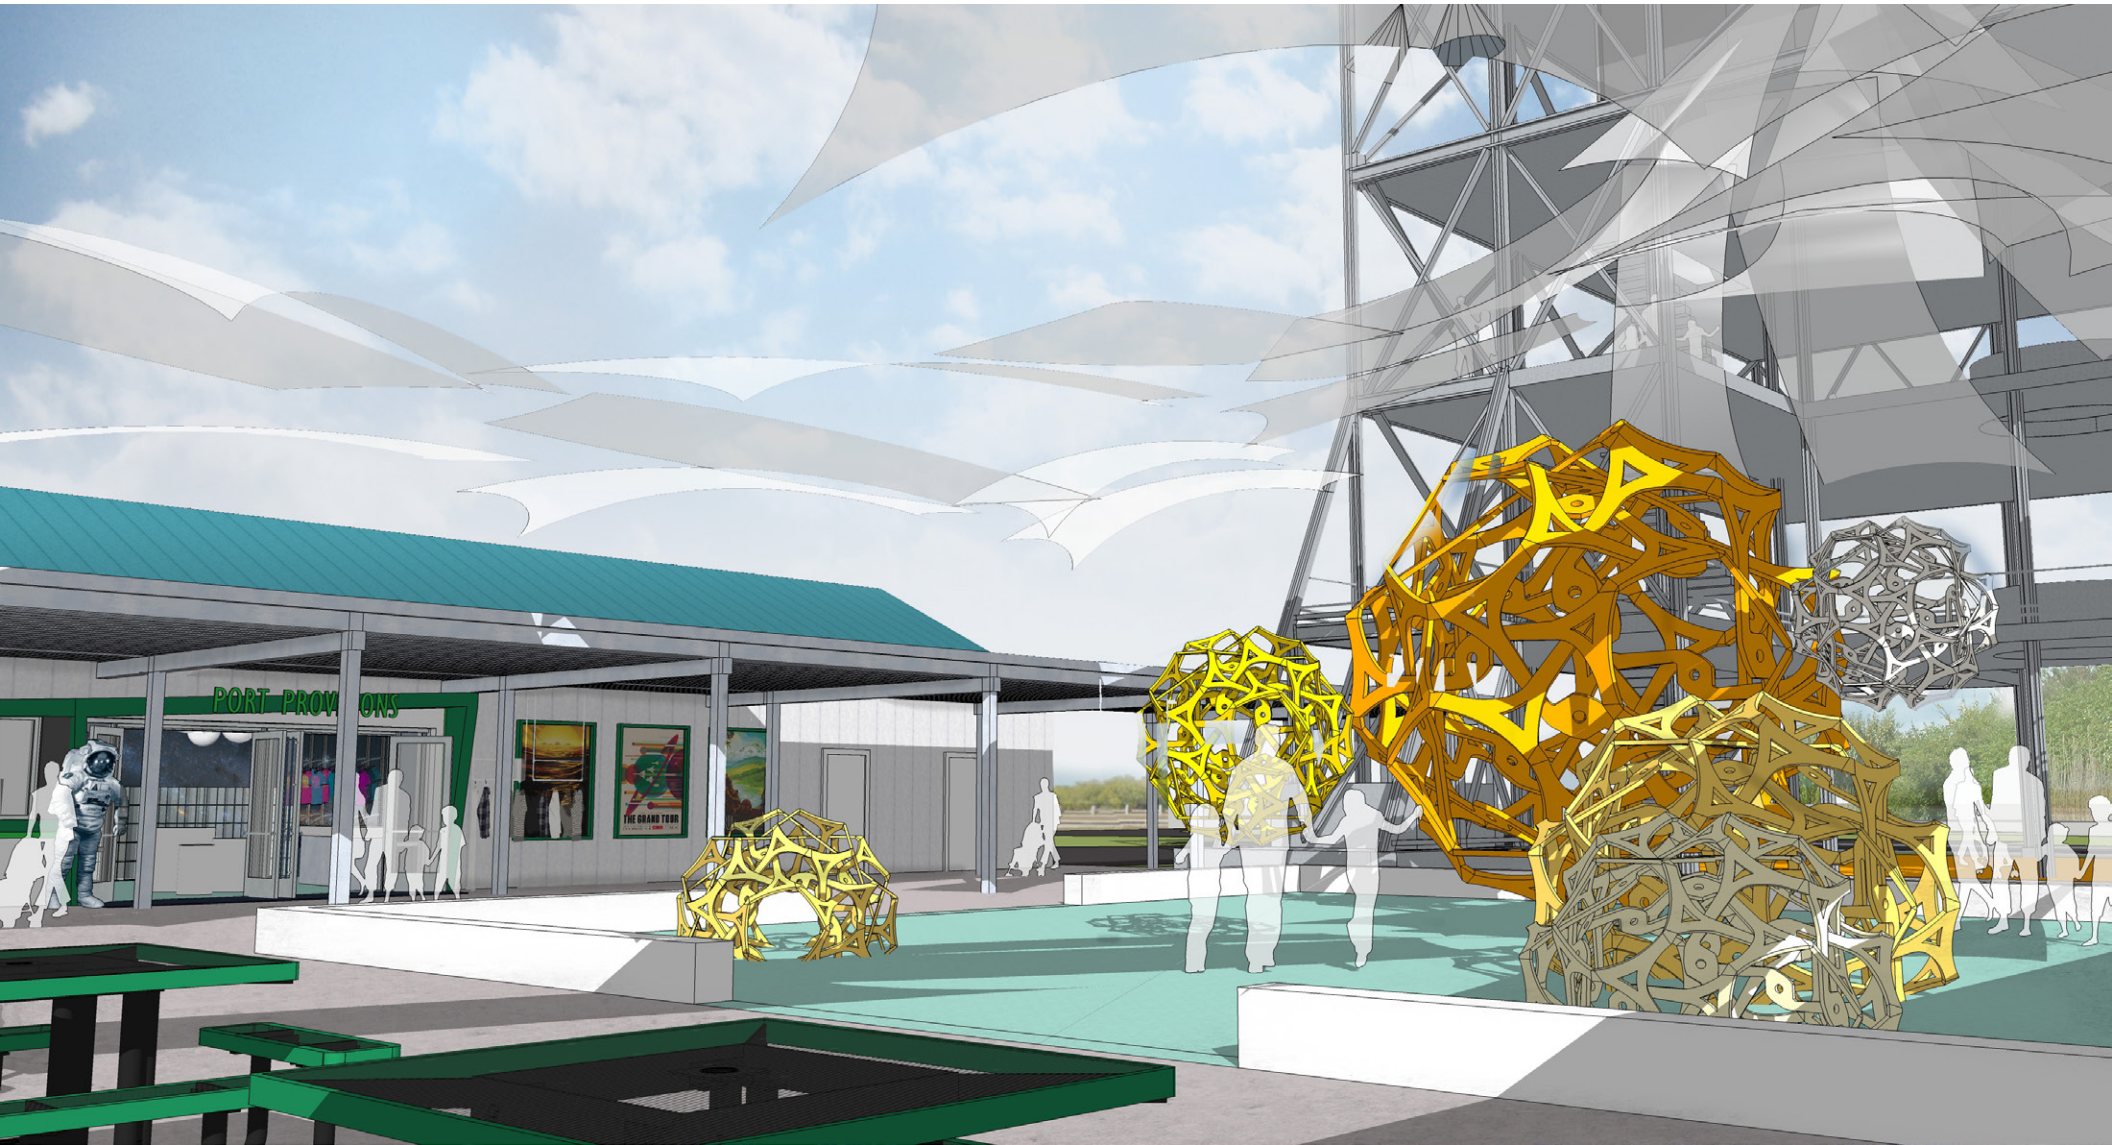

Final project was to take an existing architectural project and through a single drawing showcase unique aspects of the project. After constructing this isometric of Carlo Scarpa's Querini Stampalia Foundation in Venice, Italy, I used different layers of colors to show effects of water, the running datum, and elevation throughout the space.

JOURNEY TO OUTER SPACE!

Guests are taken for a whirlwind trip across the galaxy! Along the way they travel to alien planets, bringing back specimens to study in the ship's greenhouse and laboratories... although those finds may be more interested in conquest!

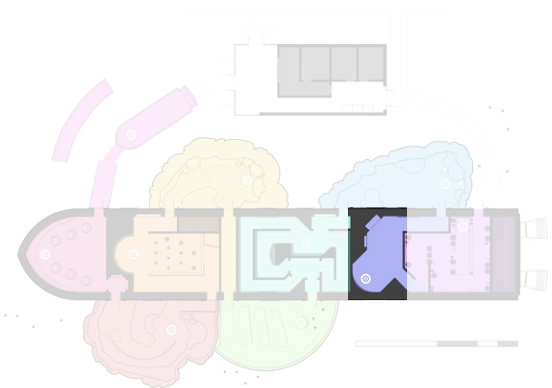

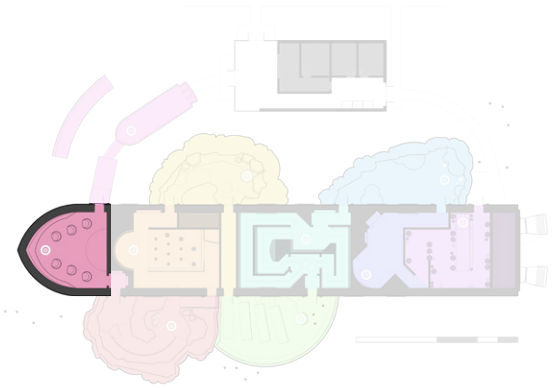

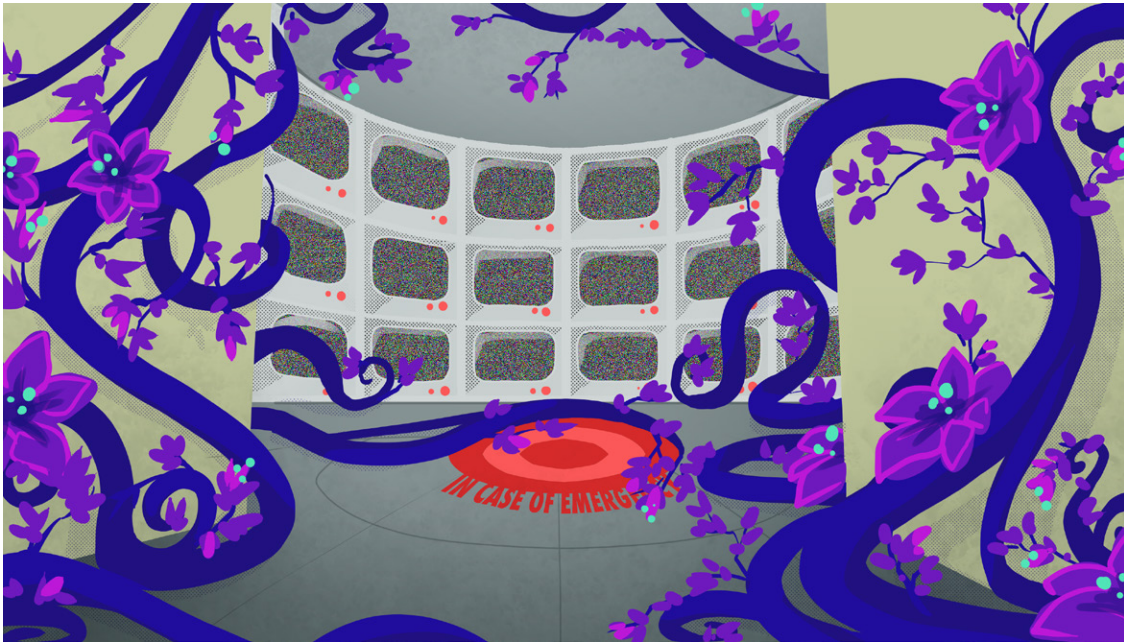

Throughout the experience, guests are rewarded for making the target and exploring the courts, through animated and mechanical effects such as lights, water spouts, animations, and sounds.

1. The Rocket Ship
2. Command Deck
3. A Rocky Planet
4. The Greenhouse
5. A Water Planet
6. Space Walk!
7. Tangled Laboratories
8. An Air Planet
9. Station Under Siege!
10. The Final Frontier (Always Something!)

LOREWOOD SUMMER CAMP QUARTERMASTER

Pack your bags for Lorewood Summer Camp, a new themed land all about fantasy and fairytales from around the world. Gather around the campfire for tales and trials of folklore, or go on an adventure yourself!

Lorewood is a place of fantasy and adventure. A Wild Hunt takes daring campers on a late-night caper of a coaster, while others find fun and education trading stories over s'mores with myths from around the world.

The Quartermaster cabin is the first and last place campers see when they visit Lorewood Summer Camp. It's where new campers can pick up official camp t-shirts and hats, while veteran campers can find the patches and pins they've "earned" during their adventures at the camp.
